

CEN4GEN™

Institute for Genomics and Molecular Diagnostics

Diagnostic service highlight

- *Over 1800 comprehensive Molecular Diagnostic services in Genetic testing and Personalized Medicine.*
- *Diagnostic, carrier, prenatal genetic testing.*
- *Analysis of all medically relevant genes of the human genome.*
- *Analysis of genetic medical conditions from all relevant medical specializations.*
- *Exceptional quality, reliability, and standards.*
- *Services undertaken by experienced and qualified professional staff using cutting edge technologies.*
